

Services

*Training, Support, Pilots Projects,
Application, Surveillance*

MaArt :: [:]

MCoating Services:

Our products, when applied by various contractors or internal teams, can be guaranteed if applied in the presence of **MCoating Services** that verifies, controls, and instructs the operators who will apply the product. **MCoating** take care of Project Management, Assistance, and Supervision.

Our inspectors also verify, upon request from the contractor and the end customer, every execution carried out without the assistance of our application teams or inspectors during the application of **Mcoating**, materials and the result of the work.

This often happens retrospectively to ensure that they have been applied according to the rules and in accordance with the recommendations given earlier. In agreement, technical theoretical and practical training courses can be offered to the personnel of each construction site.

Additionally, it will be possible to rent or purchase the necessary equipment for the work if the client wishes to proceed independently. The equipment is available through our partners or directly from **MCoating**.

Surface Preparation:

Surface Preparation Inspection.

We verify and, upon request, proceed with the surface preparation before applications:

- Degreasing and removal of pollutants
- Complete removal of salt and pollutants
- Excellent preparation of metal structures
- Complete removal of rust and corrosion
- Mechanical preparation and brushing of surfaces

Application of Protective Coatings: PRIMERS

Manual and Air-less Application of Primers:

- Stripe Coats
- Application of every paint product
- High-thickness coating
- Application of solvent-free products
- Anti-slip surfaces

Applications with bi-mixer hot spray and manual Primers:

- Application of solvent-free products
- Single-component 100% solids

Yachting, Shipping Off Shore, Industry:

Hull and Submerged Parts Treatment:

- Innovative anti-fouling cycles
- Application of Ultrasonic systems and assistance
- External Surface Treatment in Polyurethane
- Interventions on new constructions
- Coatings for Super Yachts
- Thermal Insulation for piping
- Potable water tanks
- Deck and deck treatment
- Blackwater treatment
- Engine room treatment
- Anti-vibration plates
- Engine room finishes
- Spray-applied Acoustic Dampers
- Spray-applied Anticorrosive
- Application of A60, B15 insulation
- A60 spray application
- Fire control wall application
- Restoration all areas of the ship
- Ballast tanks or cargo holds

Building and Industry:

- Floorings
- Elastic waterproof membranes for roofs
- Solar infrared reflective coatings
- Self-cleaning anti-viral and antibacterial coatings
- Thermal insulation for residential and industrial sectors
- Anti-corrosives
- Thermal insulators and Special Coatings
- Anti-mold
- Energy-saving solutions

Our Customers:
